

## 1. Testing

For sending HTTP requests in order to test my web service I used POSTMAN application:

## 2. Interface discription

<b>get /displayModel</b>	- displays current rdf model
<b>get /persons</b>	- list of all users
<b>get /persons/id</b>	- information about particular user
<b>post /persons/id</b>	- add new user
<b>put /persons/id</b>	- change information about user
<b>delete /persons/id</b>	- delete user
<b>get /persons/id/comments</b>	- get comments created by user
<b>get /coments</b>	- get list of all comments
<b>get /media/id/comments</b>	- list of comments of particular media
<b>crud /comments/id</b>	- get post put or delete methods for comments
<b>get /media</b>	- list of all media
